CMiC Open Enterprise v10 Construction Software Evolved

CMiC Open Enterprise v10 is the most advanced and technologically open construction software solution ever created. Integrating all departments on a single database, CMiC Open Enterprise v10 provides industry specific solutions for financials, project management and project controls that improve productivity and enhance efficiency. Using cutting edge technology, CMiC Open Enterprise v10 incorporates outside applications, such as BIM and online planrooms, into the organization, creating more business value. CMiC Open Enterprise v10 is the software solution of choice for leading contractors.

Digital Takeoff Table® 2

Introducing
the All-New
Digital
Takeoff
Table 2

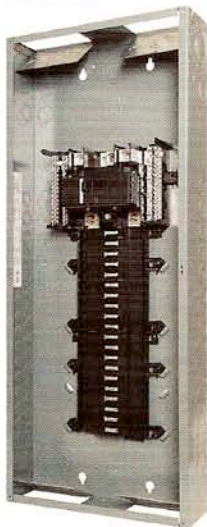

The Digital Takeoff Table 2 is On Center Software's updated hardware solution for a more productive takeoff method. Including a custom integration with On-Screen Takeoff® and added features, the new Digital Takeoff Table 2 builds upon the technology of the first Digital Takeoff Table to further increase takeoff productivity.

Square D® Service Upgrade Load Center

Innovative Design
for Faster,
Easier
Installation

by Schneider Electric

The new Square D Service Upgrade Load Center from the leader in residential electrical distribution products is designed to make flush-mount service upgrades faster, easier and cleaner. Removable end plates with four feed-through points simplify wiring and reduce drywall damage. The service upgrade load center's unique design allows the enclosure to be positioned in the wall in as little as five minutes.
