"WennSoft reduces our biggest employee expense, saving our company almost \$20,000 every year."

Kyle Hagness,
Executive Vice President for Durand Builders

Durand Builders' biggest employee expense is Workers Compensation. A significant amount of money was lost in the past due to higher expenses in this area, because their old software system couldn't track labor by employee. Now that they have WennSoft, they can track labor costs and split out the exposure codes, so they're not overpaying Workers Compensation.

WennSoft also gives their project managers the ability to see critical information – payroll, equipment vouchers, invoices, etc., which enables them to make effective business decisions in a timely basis. And because WennSoft stores and retrieves historical data easily, Durand Builders' bids are more accurate and competitive.

**COINS Procure to Pay (P2P) Solution
Drives Down the Cost of Doing Business**

The COINS P2P team has been helping worldwide construction firms and their suppliers save time and money with electronic ordering, invoicing, and payment through the COINS Electronic Trading Community (COINS-etc) since 2005. Based on average experience:

Invoices per month:	5,000 invoices
Time saved per invoice:	3 minutes
Hours saved per month:	250 hours
Amount saved per year:	\$61,500

The benefits are scalable. One COINS client currently processes over 52,000 invoices electronically per month, saving 31,200 person hours per year with a process cost saving of \$615K. Adding additional P2P components, such as eCatalog ordering or electronic payment (ACH or EFT), magnifies the processes savings.
