Construction Project Management Software

Meridian Systems, a Trimble Company, is the plan-build-operate technology solutions leader for project-based organizations.

Building owners, construction and engineering firms, and public agencies use Meridian software to effectively manage capital building programs and facility assets, from project design to close-out.

Meridian offers Prolog construction project management and Proliance infrastructure lifecycle management software solutions that reduce project costs and schedules across the plan-build-operate project lifecycle. To learn more about how project-based organizations are benefitting from Meridian solutions, watch a three-minute introduction to Meridian at

Phoenix Project Manager

Phoenix Project Manager is a scheduling tool with unique features designed for contractors and owners working on a project-by-project basis. The program has a familiar user interface and graphical output, which allows contractors to communicate about the schedule and follow the critical path. The software includes tools to filter individual activities or groups, display schedule status and forecast completions, and identify potential problems before they impact the project. The system also allows for custom layouts that tailor the schedule view based on the audience. This software supports existing standards for schedule data exchange including Primavera P3, P6, SDEF, and Microsoft Project .mpx and .xml formats, among others. With the changing construction market, contractors need to stay on schedule, and effective scheduling systems like Phoenix Project Manager can play a strong role.

ProEst Estimating

Introducing ProEst 2011, the complete construction estimating solution. With ProEst, you can create estimates, perform digital takeoffs, and manage bid day using one powerful and innovative estimating solution and a single SQL database. Integration with common business tools and accounting systems eliminates duplicate entry. Integration with online plan rooms keeps projects updated with the latest specifications. And integrated digital takeoffs allow estimators to quickly and accurately measure lengths, areas, and counts using digital plans and a mouse. As a Microsoft Gold Certified Partner, ProEst leverages the latest Microsoft development tools, including a SQL database and .net framework, to ensure superior usability of its software. ProEst 2011 incorporates a standardized Microsoft Office 2007 look and feel to increase efficiencies while lowering the learning curve. Visit our Website to download your FREE trial and see why more than 7,000 contractors use ProEst to bid with confidence.
