

AirRenew

AirRenew is a new gypsum board from CertainTeed that significantly reduces, for up to 75 years, harmful volatile organic compounds (VOCs) that circulate indoors. AirRenew is a first-of-its-kind product - and the only product on the market - that uses two technologies to actively improve indoor air quality and provide enhanced protection against moisture and mold.

For more information please visit www.certainteed.com/airrenew.

Path to NetZero by Kingspan® Insulated Panels by ECHO Interaction Group

Path to NetZero by Kingspan® Insulated Panels is a free tool for architects to simulate the process of achieving high performance energy efficient and net zero energy buildings by selecting your climate zone, building type, baseline building method, and building envelope. Through the selections of the project simulator, net zero energy modeling calculations are graphed in real-time and include: Energy Cost Savings; CO2 Reduction; ROI; LEED®; and Build Speed.

For more information please visit <http://pathtonetzero.com>.

Cradle to Cradle® Certification for 3 new glass products by PPG

SOLARBAN® R100 glass, SUNGATE® 400 glass and CLARVISTA™ shower glass by PPG Industries have earned CRADLE TO CRADLE® Certification at the Silver tier.

- Solarban R100 glass is a neutral-reflective, solar control, low-emissivity glass with visible light transmittance (VLT) of 42 percent, a solar heat-gain coefficient (SHGC) of 0.23, and a 1.79 light-to-solar gain (LSG) ratio.
- Sungate 400 glass is a passive, low-e glass with a magnetron-sputtered vacuum deposition (MSVD) "soft coat" that helps commercial buildings in heating-dominated climates retain heat from the sun and reduce winter heating costs.
- Clarvista shower glass for shower doors and bath and shower enclosures.

PPG earned Cradle to Cradle Certification for all its architectural glass products in 2008, and it remains the only glass manufacturer in the world to have achieved this distinction. Cradle to Cradle Certification is awarded by MBDC (McDonough Braungart Design Chemistry), which independently evaluates the total impact of a product on human health and the environment throughout its life cycle.

Building projects seeking Leadership in Energy and Environmental Design (LEED) certification from the U.S. Green Building Council may be able to earn one point in the "Innovation in Design" category by using Cradle to Cradle Certified products. Visit www.ppgideasces.com or call 1-888-PPG-IDEA (774-4332) for more information on PPG's entire line of Cradle to Cradle Certified architectural glass products.
