ON CENTER SOFTWARE'S QUICK BID 4.8 NAMED A BEST NEW PRODUCT BY PROFESSIONAL BUILDER MAGAZINE

THE WOODLANDS, TEXAS (June 9, 2008) – Quick Bid 4.8, the 20th anniversary edition of On Center Software's popular estimating application for the construction industry, has been selected as one of the "100 Best New Products" for 2008 by *Professional Builder* magazine. The award, announced in the June issue, recognizes Quick Bid 4.8 as a product innovation and reflects the publication's initiatives to reward manufacturers that are investing in research and development.

"Two decades ago, when the concept for Quick Bid took shape on my kitchen table, I knew it had the potential to transform the way construction industry professionals work," said Leonard Buzz, On Center Software's president and CEO. "I'm thrilled that today, Quick Bid is helping estimators complete bids faster and more accurately than ever before, and continuing to earn industry accolades for innovation."

Quick Bid's patent-pending features enable estimators to be more thorough and productive by automating many of the functions they formerly performed manually. The software facilitates quick, easy generation and adjustment of bids, helping estimators win more bids and increase profitability.

On Center Software is the leading provider of electronic plan viewing, takeoff, estimating and production tracking software for the construction industry. In addition to Quick Bid, the products in its ProfitBuilding™ Suite include On-Screen Takeoff® and Digital Production Control™.
