ON CENTER SOFTWARE RELEASES ON-SCREEN TAKEOFF® VERSION 3.8 AND QUICK BID VERSION 4.91

The Woodlands, Texas (July 22, 2010)--On Center Software proudly announces the release of On-Screen Takeoff® Version 3.8 and Quick Bid Version 4.91. Using customer feedback and user requests to further improve On Center Software's program capabilities, On-Screen Takeoff and Quick Bid have added enhancements to their award-winning estimating and bidding technology.

For years, estimators and contractors have been using the Overlay tool within On-Screen Takeoff to efficiently compare plan revisions and spot unmarked changes. With the overlay tool, deleted items are clearly marked in red, while newly added items are in blue. Items that remain the same are simply grayed out. This feature saves users from missing addendums that aren't clouded, and it automatically marks the changes for those out in the field.

On-Screen Takeoff Version 3.8 will redefine the term "overlay," making mismatched superimposed images obsolete. New overlay features include:

- Automatic resizing and aligning for overlay images
- Ability to rotate overlay images independent of base image
- De-skew function for overlay images

Additional features include:

- Enhanced PDF handling
- Sorting capabilities in Open Database dialog box

Quick Bid 4.91 is now equipped with new features as well, including:

- A new Production View menu, with added
 - Material size visibility
 - Crew size and crew days visibility
 - Percent Base column
- Additional Accounting Exports
 - ComputerEase
 - Jonas Accounting
 - Maestro Accounting
 - StarBuilder/StarImport
- New Bid Report Table to support third-party custom reports

The On-Screen Takeoff Version 3.8 and Quick Bid Version 4.91 upgrade is free for all existing On Center Software customers currently on our Annual Upgrades and Support subscription. To learn more about this and other products, visit www.oncenter.com.
