WINESTIMATOR INTRODUCES CUSTOM INTEGRATION WITH ON CENTER SOFTWARE'S ON-SCREEN TAKEOFF®

The Woodlands, Texas (August 27, 2010)—On Center Software, the leading construction-industry software developer, proudly announces a takeoff software integration developed by current business partner WinEstimator, Inc. The new software integration will give WinEst users direct access to On Center Software's On-Screen Takeoff® for a fast, efficient estimating tool.

The custom integration between On-Screen Takeoff and the WinEst estimating program allows both companies to offer even more specific solutions to their customers. "We are excited about the integration WinEstimator developed between On-Screen Takeoff and their construction estimating products. Giving contractors the ability to access electronic plans and specs from a multitude of sources and present a fully color-coded quantity takeoff with their cost estimate is an excellent sales tool for GCs and Subs alike," says Leonard Buzz, On Center Software CEO.

According to Steve Watt, WinEstimator president and CEO, WinEstimator developed the integration out of a recognized need for more takeoff efficiency for estimators. "Our ears are always to the ground when it comes to what the industry needs and what's being talked about out there... It's another rubber-meets-the-road example of how our on-going research and development responds to the needs of the industry. It's going to turn some heads."

This partnership furthers On Center Software's goal to improve construction practices and drive positive project results through the use of technology designed specifically for the industry.

About On Center Software, Inc.

Located in The Woodlands, Texas, On Center Software, Inc., is a privately held company providing software and training to construction-industry professionals. The company's mission is to transform the estimating, takeoff and production-tracking experiences for construction-industry professionals by developing and supporting innovative, practical, comprehensive software solutions that turn winning bids into profitable projects. The On Center Software line of products includes Quick Bid, On-Screen Takeoff®, Digital Production Control™ and the Digital Takeoff Table®2.

About WinEstimator
