

What if you could

increase your bid accuracy and speed, and have the vital information where you need it, when you need it, so you can win more profitable bids?

Would you like your bids to be thorough and accurate every time? Can you imagine how much more profitable you could be if you could cut down on even some of your bid errors?

WITH QUICK BID YOU CAN INCREASE ACCURACY AND PROFITS

- **Minimize** data-entry **mistakes**
- **Reduce** calculation **errors**
- Avoid bidding too low or too high
- Quickly **fine-tune labor production**
- **Analyze labor productivity** within a condition
- Easily check bid **production rates** for difficulty
- Quickly **check ratios** of material to labor
- **Know the cost** of the job before submitting it
- Prioritize conditions by cost to see where money is on the job
- Review bids in a timely and consistent manner
- **Know the impact of changes** on affected areas
- Check the job duration outline in the contract against man-days in the estimate
- Evaluate **detailed cost information**
- **Break down labor** by crew, unit, price, lump sum price, production, or man-days
- Analyze material, labor rates, change orders, and alternates
- Easily review and adjust production or unit cost values

Quick Bid
Professional Estimating Software

THE FASTEST WAY TO ESTIMATE A BID FROM START TO FINISH ON YOUR PC!

Quick Bid is a powerful estimating program that can help almost any construction professional bid jobs faster and more accurately. Why spend hours crunching numbers on a calculator when Quick Bid can do the work for you?

Apply quantities to a single area or spread across multiple areas.

Save breakouts for multiple CSI sections and unit totals.

Change a material setup on the fly with the click of a mouse.

Add an unlimited number of material or labor items.

Simply click on any material or labor price to make adjustments.

Change production rates on the fly.

Click on the assembly button to save a frequently used group of materials and labor.

View and adjust multiple labor items by time or money.

Quick Bid
Professional Estimating Software

REDUCE THE TIME YOU SPEND IN THE BID PROCESS

- **Quickly review**, adjust, and recalculate **labor**
- Automatically calculate material
- Easily **update price** quotes
- Instantly **generate** materials **lists**
- Provide **consistent pricing** on similar conditions
- Quickly recalculate last-minute addendum changes
- **Minimize time** for change orders and alternates
- Access a **library of assemblies** that store condition-specific material information and labor production with a click of a button

INCREASE THE EFFICIENCY OF YOUR ENTIRE BIDDING PROCESS

- Efficiently **manage materials** to be sent to the job site
- Quickly **analyze** material and labor project costs **by cost codes** and/or CSI sections
- Easily **evaluate** job payroll budget **by pay class**
- Provide detailed material and labor reports for your field personnel
- **Generate reports** that break down stocking material by areas and/or CSI sections
- Generate detailed paper and electronic reports for **cost accounting**
- **Price change orders** as they occur, separate from bid pricing
- **Analyze production rates** for change orders vs. base bid
- Quickly **identify** labor aspects of the bid that are exposed to a **high risk**
- Easily verify and check the bid with **an audit trail** of estimated items

Why spend hours crunching numbers on a calculator when Quick Bid can do the work for you?

Quick Bid enables your estimators to be more thorough and productive by automating many of the functions you now perform manually. Bids can be adjusted easily and quickly, allowing you to recalculate last-minute addendum changes. Quick Bid gives you the ability to quickly generate new estimates, allowing you to increase your chances to win more bids and grow your profits.
